

Summary

I am an Industrial Design graduate from Eindhoven University of Technology. There, I have mostly focused on improving the UI/UX of music listening in social settings. Nowadays, I focus on design engineering websites. Having knowledge of both the frontend and the backend, I am able to craft the experience exactly as desired. Due to my background in Industrial Design, I bring a fresh, user-focused perspective to web design.

Education

Masters Degree	Industrial Design (Design Leadership and Entrepreneurship)	Eindhoven University of Technology	2024
Bachelors Degree	Industrial Design	Eindhoven University of Technology	2021
High School	Gymnasium (Nature & Technology)	Scholengemeenschap Groenewald	2018

Qualifications

Former Work

Fullstack Developer	Rootnote	Rootnote is a website that allows groups to gain insight into their collective music listening habits. I did all the development for this platform, frontend and backend. as well as the design and marketing. Rootnote currently has over 1000 users.	2021-Now
Web Designer	Freelance	I have been designing websites for various small companies next to my studies. From small businesses to web3 companies, I have been able to use my frontend development skill set to strengthen their brands.	2020-Now

Digital

Frontend Development	HTML, Javascript, CSS, Vue, Astro	*****
Backend Development	Python, Django, Postgres, Redis, Supabase, Typescript	*****
Visual Design	Figma, Illustrator, Photoshop	*****
3D Rendering	Blender	*****

Real

User Studies	UX Research, User Validation	*****
Prototyping	Rapid Prototyping, Soldering, Arduino	*****
Business	LEAN, Agile, Product Development	*****

Languages

Dutch	Native	*****
English	Cambridge C2	*****
